

2) (10 pts) ALG (Sorting)

(a) (5 pts) Consider running an Insertion Sort on the array shown below. How many swaps will execute for the duration of the algorithm running on the array shown below? Explain how you got your answer.

35	25	15	29	39	22	19	6	21
----	----	----	----	----	----	----	---	----

Reasoning:

Number of Swaps: _____

(b) (5 pts) List the **average case** run time of each of the following sorting algorithms, in terms of n , the number of items being sorted. (Please provide Big-Oh bounds.)

- (i) Insertion Sort _____
- (ii) Selection Sort _____
- (iii) Heap Sort _____
- (iv) Merge Sort _____
- (v) Quick Sort _____
