

1) (10pts) ANL (Algorithm Analysis)

Determine the **best case** run time in terms n for each of the following functions/operations.

- a) Finding the maximum value in an unsorted linked list of n elements $O(n)$
- b) Inserting an item into a binary search tree of n elements $O(1)$
- c) Inserting an item into a binary heap of n elements $O(1)$
- d) Sorting an array of n elements using Merge Sort $O(n \lg n)$
- e) Deleting an element from a circular linked list of n elements $O(1)$

Grading: 1 pt each, must be correct to earn the point.

Determine the **worst case** run time in terms of n for each of the following functions/operations.

- f) Deleting an item from an AVL tree of n elements $O(\lg n)$
- g) Deleting the minimum item from a binary min heap of n elements $O(\lg n)$
- h) Inserting an item into a binary search tree of n elements $O(n)$
- i) Sorting an array of n elements using Heap Sort $O(n \lg n)$
- j) Deleting an element from a doubly linked list of n elements $O(n)$

Grading: 1 pt each, must be correct to earn the point.
