- 3) (10 pts) ANL (Summations and Recurrence Relations)
- (a) (5 pts) Determine the following sum in terms of n:  $\sum_{i=1}^{2n-1} (3i-2)$ .

(b) (5 pts) Let  $T(n) = 3T\left(\frac{n}{2}\right) + n^2$ . In using the iteration technique (3 steps) to solve the recurrence, we arrive at an equation of the form:  $T(n) = AT\left(\frac{n}{8}\right) + Bn^2$ . Find A and B.
